

Big Blue 3 in 1 Household Filtration

Warranty – 1 year walk in warranty, damage due to negligence will not be covered.

BIG BLUE 3 IN 1 WATER PURIFICATION SYSTEM

- This 3 in 1 20" Jumbo Big Blue water purification system is installed on the main water supply of the household.
- Supplies and purifies the household's water from sediment, rust and chemicals. (Such as chlorine, pesticides, heavy metals such as copper, lead and gold.)
- Our state of the art 8kg siliphos filter prevents the formation of scale in valuable pipes, geysers and kettles. Siliphos also has a remarkable anti-corrosive effect.
- The siliphos filter has been successfully tested in areas where scale formation is very common.
- Up to 750 000 litres of water can be treated before the siliphos filter needs to be replaced. Water with hardness of up to 20dH (+- 3602ppmCaCo₃) can be safely treated with siliphos to prevent scale.
- One of the most important benefits of the big blue water descaler and purifier is that it requires very little maintenance and maintenance cost is extremely affordable.
- In areas where the water pressure is less than 1½ bar it is advisable that a booster pump be installed to ensure better flow.

UV Light optional:

The UV light kills 99% of all water born bacteria and it is advisable to include this for optimum results.
